

Fig. S1

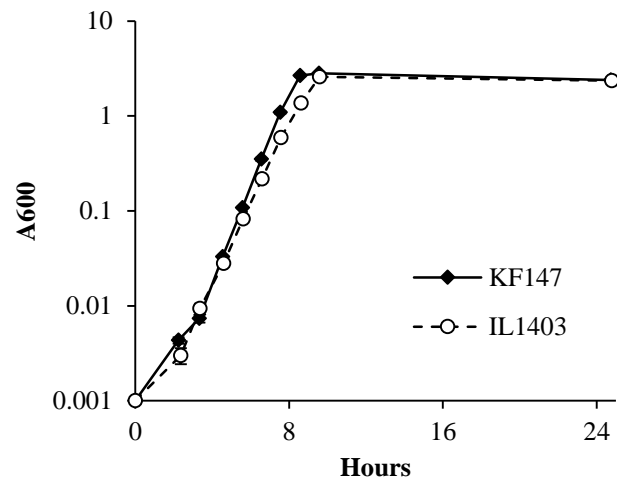

Figure S1. Growth of *L. lactis* in GM17. *L. lactis* KF147 (solid line, filled diamonds) and *L. lactis* IL1403 (dashed line, open circles) was inoculated into GM17 and growth was measured over 25 h by absorbance at 600 nm. Growth curves were performed in triplicate and data points represent the avg \pm se.
